

Trek to the Top of the World

List at least one way an increase in altitude can affect the human body and one way it affects plants or animals for each of the mountain zones shown below.

The diagram shows a mountain profile with three distinct altitude zones, each marked by a horizontal line and labeled with its approximate elevation. Each zone contains two numbered blanks for student input.

Near 8,000 meters

1. _____

2. _____

Near 5,500 meters

1. _____

2. _____

Near 3,000 meters

1. _____

2. _____
